

ALUMINUM LETTERS

Traditional Unitype and SureGrip

SureGrip

Our aluminum letters can be used with any manufacturer's metal rail inner copyboard. The Traditional or Unitype letters (TA) have one hook at top. Sure Grip (AL) are designed to hold more securely at the top and bottom of letter. Both styles are available in white letter-on-black background (for black inner boards), or black letter-on-white background (for white inner boards). Individual characters available. Call for pricing.

Traditional

SureGrip Aluminum Letters
